

## Quick Guide to Electric New Construction

New Construction Applications for residential and commercial jobs should be submitted by the party who will be responsible for the account as early as possible. Incomplete applications will not be processed. If you need an address for your service location, please call your local City or County Planning & Zoning office. All applications to be completed online @ [www.uesaz.com/construction\\_services](http://www.uesaz.com/construction_services). For questions or application assistance please contact the UniSource Engineering offices below:

<u>CITY</u>		<u>PHONE</u>	<u>FAX</u>
<b>Kingman:</b>	2498 Airway Avenue – Kingman, AZ 86409	928-681-8969	928-681-8920

For electric specifications, please obtain our booklet, “Electric Service Installation Requirements”, view/print the booklet on our website listed above.

### Customer Requirements:

- Completed application
- Electric panel
- If underground service, trench with conduit and pull string provided by customer and inspected and approved by UniSource
- Electric inspections from City, or County (Green Tags in Mohave/Santa Cruz County and Red Tags City of Nogales.)
  - Kingman: City 928-753-5561, Mohave County 928-757-0903
  - Lake Havasu City: City 928-453-4149, Mohave County 928-757-0903
  - Nogales: City 520-287-7245, Santa Cruz County 520-375-7880

### Contact UniSource Engineering:

- When customer is ready for a trench inspection prior to backfilling trench, contact: Kingman 928-681-8924 - Lake Havasu 928-505-7017 - Nogales 520-761-7951
- When customer is ready for an electric panel inspection after obtaining all electrical inspections (Green or Red Tags) contact engineering offices listed above.

### Free Footage Allowances for Permanent Residence:

- A maximum of 550 feet of single-phase primary distribution line and service line

### Additional Cost for Electric Facilities

- Cost to customer will be based on estimated installation cost. Line extension costs vary depending on location, terrain and length of lines. You will be notified once the cost is determined after the job is drafted by UniSource Engineering Dept.

### Permanent Residence:

- Site-built home or a manufactured home at least 400 square feet
- County approved septic and water systems
- If your home does not meet these permanency requirements, there are no free footage allowances, and payment is required in advance for all electric facility construction.
