

**Preliminary Request for Information for Projects Subject to
the Public Utility Regulatory Policies Act of 1978 (PURPA)
Tucson Electric Power Company and UNS Electric, Inc.**

Instructions:

Please provide the information requested below to commence processing of any requests subject to PURPA to sell power to Tucson Electric Power Company ("TEP") and/or UNS Electric, Inc. ("UNSE"), as applicable. Please complete this form and append to it any supporting information requested below to:

Renewables - PURPA or PURPA@tep.com
Mail Stop HQE502
88 E Broadway Blvd
Tucson, AZ 85701

PLEASE NOTE: Project owners requesting to interconnect facilities to the TEP and/or UNSE systems will be required to submit a formal application in accordance with TEP/UNSE procedures. For more information, please contact Interconnections@tep.com

Request for Information:

Please provide the following information:

1. Form 556 and Federal Energy Regulatory Commission docket number for each project you are seeking to interconnect for the purpose of selling the output to TEP and/or UNSE.
2. Articles of Organization for the company that own the projects you would like to interconnect, including company address and a corporate organizational chart showing the ownership structure of the company.

3. Form Completion and Authorized Point of Contact Information. Please submit the following information regarding completion of this form and authorized points of contact for owner of the qualifying facility.

Name of person completing this form:

City, State, and Zip Code:

Phone number:

Authorized Representative of Applicant: (Y/N) _____

Authorized Point of Contact: (Y/N)

If no, please provide the Authorized Point of Contact (name, address, phone number, email address) for the legal entity:

4. The name and specific location of the facilities. Please append any maps.

5. A brief description of each facility, including a statement whether it is a small power production facility or a co-generation facility.

6. The primary source of energy used or to be used by each facility.

7. The capacity of each facility for the production of power.

8. The percentage of ownership which will be held in each facility by any electric utility or any holding company of a public utility.

9. Proof that the owner or operator of each facility controls or will obtain control of the site for the facility. Please append any supporting information.

10. Interconnection status of each qualifying facility. Please provide the interconnection status of your project(s), including, if applicable, application status, queue positions, study requests and payments, agreements, etc. [distribution 46kV and below, or transmission interconnection (69kV and above)]

Use and/or attach additional sheets as necessary
