Stand-Alone Electric Vehicle Charging (DCFCX)

AVAILABILITY

Available throughout the Company's entire electric service area where the facilities of the Company are of adequate capacity and are adjacent to the premises.

APPLICABILITY

This optional rate schedule is available to General Service customers where electricity is primarily consumed by electric vehicle charging stations that are separately metered from other facilities unless those facilities are incidental to the charging load (e.g. irrigation system timer or high efficiency area lighting).

Other buildings that are on the same lot as the vehicle charging facilities (such as convenience stores or fleet maintenance facilities) will be separately metered and classified as non-residential under the appropriate general service rate.

Customers may switch between applicable rate tariffs once in a rolling twelve-month period.

Service under this rate will commence when the appropriate meter has been installed by UNS Electric.

Not applicable to breakdown, temporary, standby, auxiliary service, or service to electrical equipment that causes excessive voltage fluctuations.

Resale of energy for the use of electric vehicle charging is allowed under this tariff.

CHARACTER OF SERVICE

The service shall be single or three-phase, 60 Hertz, and at one standard nominal voltage as mutually agreed and subject to availability at point of delivery.
