

BEWARE OF SCAMMERS

While UniSource Energy Services embraces solar energy, we do not endorse specific companies that sell, lease, install or finance private solar arrays.

We've received increasing reports about solar solicitors claiming to be affiliated with UniSource. While we assist customers and their chosen vendors through the solar application and approval process, we do not have "preferred" or "approved" solar contractors.

UniSource does not share customers' account details or personal information with solar solicitors. Be skeptical if any solicitor claims to have access to your energy use or billing data. Be aware that your name and some details about your home may be available through public records.

We also have received reports of solar solicitors claiming to be from UniSource attempting to access customers' property and electrical equipment or trying to sell solar panels or installation services. Please be wary in such instances and contact us directly to confirm if UniSource representatives are scheduled to perform authorized work.

Please call us at 1-877-837-4968 to report any such issues with solar solicitors and, if possible, to provide the company's name.

Visit [uesaz.com](https://www.uesaz.com) to learn more about solar energy and for tips on how to identify our field workers.
